

GRINDING IN NEW DIMENSIONS

Since its foundation in 1990, CEMTEC has been an ambitious and expanding company. We implement projects in the cement, processing and bulk material industries all around the world, from design over engineering up to manufacturing and commissioning.

In order to strengthen our dynamic, international team as soon as possible, we are currently seeking:

Electrical Engineer (f/m)

Full-time (38,5h weekly) / Place of work: Enns, Austria

Responsibilities:

- Electrical Engineering: create, maintain and standardize wiring diagrams, single line diagrams, grid calculations, equipment lists
- Review, test and resolve industrial machinery fault conditions
- Create equipment specification, proposal evaluation and requisitioning
- Prepare engineering calculations to assure safety and performance of equipment and systems

Requirements:

- Bachelor's degree in Electrical Engineering or Electrical Engineering Technology from an accredited institution
- 2+ years of experience with EPLAN P8
- English B2 level
- Analytical thinking, high process orientation, precision of execution and documentation
- Independance, willingness as well as a lot of motivation and commitment
- Ability to work in a team environment.
- Strong attention to details.
- Strong customer orientation and excellent communication skills

At CEMTEC you will not only find a broad field of responsibility and a performance-based salary, but also chances for professional development within the company, after in-depth initial training.

We offer you a gross salary in the range of EUR 40.000,-- to EUR 60.000,-- according to the Austrian legal regulations, depending on your qualifications and work experience as well as a chance for long-term career planning.
